Secure a position where my leadership and experience can be utilized creating an increasing level of responsibility while being able to complete my Computer Science and Mathematics degrees from Regis University

Education

Regis University	Mathematics & Computer Science	3.9 GPA	Denver, Co	Attending
Computer Learning Center	Programming	4.0 GPA, <i>Cume Laude</i>	Los Angeles, Ca	1991
Moorpark College	Mathematics & Engineering	3.2 GPA	Moorpark, Ca	1984

Experience

Network Administrator	Aorist Consultants	2002 - Present
Web Developer & System Administrator	Alpine Access, Golden, Co	2001 - 2001
Instructor Advanced Networking	Westwood College of Technology, Denver, Co	2000 - 2000
President	Internet Solutions for Business, Littleton, Co	1999 - 2000
Network Administrator	C-Quad Systems, Littleton, Co	1996 - 1998
Programmer & Web Master	Colorado Division of Wildlife Dept of Natural Resources, Denver, Co	1995 - 1996
Programmer	StarPak International, Greeley, Co	1994 - 1995
Consultant	Kevin Fries Programming & Network Solutions, Denver, Co	1989 - 1999

Relevant Experience

Hardware / Operating Systems

- Setup and management of Sun Solaris 2.6 & 8 servers and workstations on both SPARC and Intel architectures.
- Maintenance of BSD servers running on Intel architecture.
- Setup, maintenance, and training of Linux servers and workstations running on Intel architecture.
- Setup, maintenance, and training of Windows NT servers and workstations running on Intel architecture.
- Configuration and training of Cisco routers

Application Software Management

- Installation, configuration and training of web server software including IIS and Apache
- Installation, configuration, and training of server side scripting technologies such as ASP and PHP
- Installation and configuration of web enterprise tools such as Microsoft Transaction Server, Jakarta-Tomcat, and Web Logic.
- Installation, configuration, and training of enterprise class database systems such as SQL Server, Oracle, and MySQL
- Setup and configuration of e-mail server services such as SendMail, QMail, Courier IMAP and IMail
- Setup and configuration of client access services such as SSH, Samba, and MacFile
- Setup and configuration of remote desktop management systems via VNC
- Configuration, and training of TCP Network Services such as DNS and DHCP

Project Management

- 12 years consulting between my own consulting firm and in partnership with another. During that time, many projects were built ranging from current system upgrades, to full life-cycle development.

Software Development

- Java programming using Swing (JFC) for client side applications, and Servlet / JSP for server and web based applications.
- C/C++ programs in Borland C++ 5.0 and Visual Studio 2.0-6.0 including Windows and command line programs. Libraries / Tools required for some projects include OWL, MFC and ATL. Visual C++ used to create ASP server-side scripting object to be included in web development (server-side ActiveX). Visual C++ used to create ActiveX components to be included in client applications or used inside MTS transactions. NT Services written using Visual C++ and ATL.
- Visual Basic client programs written often using ActiveX components written in Visual Basic or C++
- Clarion and Clarion for Windows business based applications
- xBase programming including dBase III+ through dBase V, FoxPro/FoxBase through FoxBase 6.0, Clipper 5.0
